

Product Specification Document (PSD)

Product Name

LeadFlow AI – AI-Powered CRM & Sales Automation Platform

1. Product Overview

Purpose

LeadFlow AI helps businesses automatically capture, qualify, engage, nurture, and convert leads using AI.

Instead of manually managing spreadsheets, follow-ups, outreach, and customer conversations, LeadFlow AI acts as an intelligent sales assistant that automates the entire lead lifecycle.

Problem Statement

Sales teams often struggle with:

- Manual lead tracking
- Slow follow-ups
- Poor lead qualification
- Missed customer replies
- Low conversion rates
- Fragmented communication channels
- Lack of visibility into lead progress

LeadFlow AI solves these problems through AI-driven automation and analytics.

2. Target Users

Primary Users

- Agencies
- Consultants
- Startup Founders
- Small Businesses
- Sales Teams
- B2B Service Providers

Ideal Customer Profile

Companies that:

- Generate 50–5,000 leads/month
- Use email outreach
- Need follow-up automation

- Want AI-assisted sales workflows

3. Core Product Vision

A business should be able to:

1. Import a lead
2. Let AI qualify it
3. Generate personalized outreach
4. Send communication
5. Analyze replies automatically
6. Schedule follow-ups
7. Predict conversion probability
8. Track the entire customer journey

without manual intervention.

4. Product Features

Module 1: Lead Management

Features

- Create Lead
- Edit Lead
- Delete Lead
- Lead Search
- Lead Filtering
- Lead Assignment
- Lead Status Tracking

Lead Fields

- Name
- Email
- Phone
- Company
- Source
- Stage
- Status
- Priority
- Notes

Module 2: AI Lead Qualification

Purpose

Determine lead quality automatically.

AI Outputs

```
{  
  
  "score": 88,  
  
  "category": "hot",  
  
  "buying_intent": "high"  
}
```

Categories

- Hot
- Warm
- Cold

Benefits

- Prioritize best opportunities
- Reduce wasted outreach

Module 3: AI Outreach Generation

Channels

- Email
- WhatsApp
- LinkedIn

AI Generates

Email

- Subject
- Body

WhatsApp

- Personalized message

LinkedIn

- Connection request
- Follow-up message

Inputs

- Lead data
- Qualification score
- Business context
- Pain points

Module 4: Conversation Engine

Purpose

Store customer interactions.

Channels

- Email
- WhatsApp (future)
- LinkedIn (future)

Features

- Conversation Threads
- Message History
- Reply Tracking
- Thread Matching

Module 5: AI Reply Analysis

Purpose

Understand customer responses.

Example Output

```
{  
  
  "intent": "pricing_objection",  
  
  "sentiment": "positive",  
  
  "recommended_action": "share_pricing"  
}
```

Supported Intents

- Interested
- Needs Information
- Pricing Objection
- Competitor Objection
- Meeting Request
- Follow Up Later
- Not Interested
- Unsubscribe

Module 6: AI Autopilot

Modes

Manual

AI suggests reply.

Suggested

AI creates draft.

Automatic

AI sends approved replies automatically.

Safety Rules

Never auto-send when:

- Unsubscribe detected
- Legal complaint detected
- Confidence too low
- Negative sentiment

Module 7: Follow-Up Engine

Purpose

Ensure no lead is forgotten.

Rules

No Reply

- Day 3
- Day 7
- Day 14

Interested

- Follow-up in 2 days

Pricing Objection

- Follow-up in 3 days

Meeting Request

- Immediate action

Unsubscribe

- Stop follow-ups

Module 8: Conversion Prediction

Purpose

Predict deal closure probability.

Output

```
{  
  
  "probability": 82,  
  
  "confidence": 0.91  
}
```

Categories

- High Probability
- Medium Probability
- Low Probability

Module 9: Lead Journey Tracking

Purpose

Provide complete visibility into lead progress.

Journey Timeline

Example:

Lead Created

↓

Qualified

↓

Outreach Generated

↓

Email Sent

↓

Customer Replied

↓

Reply Analyzed

↓

Follow-up Created

↓

Conversion Predicted

Features

- Timeline View
- Current Stage
- Progress Percentage
- Journey Summary

Module 10: Analytics Dashboard

Metrics

- Total Leads
- Hot Leads

- Warm Leads
- Cold Leads
- Conversion Rate
- Reply Rate
- Follow-Ups Due
- Pipeline Value
- AI Qualification Distribution

Charts

- Lead Sources
- Conversion Funnel
- Lead Status Breakdown
- AI Performance Metrics

5. User Workflow

Step 1

Import Lead

Step 2

Step 9

Journey Timeline Updated

Step 10

Deal Won or Lost

6. Non-Functional Requirements

Performance

- API response < 500ms
- Dashboard load < 2 seconds

Reliability

- 99.9% uptime target

Security

- Environment variable secrets
- API key protection
- Input validation
- Audit logging

Scalability

- Multi-tenant ready
- Thousands of leads
- Thousands of conversations

7. Integrations

AI

- NVIDIA NIM
- Gemini
- Ollama

Email

- Resend (Primary)
- SMTP (Fallback)

Communication

- Email
- WhatsApp (Future)
- LinkedIn (Future)

8. Future Roadmap

Phase 2

- WhatsApp Integration
- LinkedIn Integration
- Team Collaboration
- Calendar Scheduling

Phase 3

- Voice AI Agent
- Meeting Transcription
- CRM Integrations
- Multi-Tenant SaaS

Phase 4

- AI Sales Coach
- Revenue Forecasting
- Automated Deal Closing Workflows

Success Criteria

A user can:

1. Add a lead
2. Let AI qualify it
3. Generate outreach
4. Send communication
5. Receive and analyze replies
6. Schedule follow-ups
7. Predict conversion likelihood
8. View the entire lead journey
