

Product Specification Document (PSD)

LeadFlow AI

AI-Powered Sales Operations Agent

Version: 1.0

Prepared By: Team LeadFlow AI

1. Product Overview

Product Name

LeadFlow AI

Product Category

AI-Powered Sales Automation Platform

Tagline

Transform Raw Leads into Qualified Sales Conversations.

Product Vision

LeadFlow AI aims to automate the entire lead conversion journey for agencies and service businesses by using artificial intelligence to qualify leads, generate personalized outreach, analyze customer responses, and automate follow-ups.

Unlike traditional CRM systems that primarily store customer information, LeadFlow AI actively participates in the sales process and helps businesses close more deals.

2. Problem Statement

Businesses generate leads from multiple channels such as websites, forms, advertisements, and spreadsheets.

Common challenges include:

- Manual lead qualification
- Poor lead prioritization
- Generic outreach
- Missed follow-ups
- Lost sales opportunities
- Lack of conversation tracking

As lead volume increases, managing these activities manually becomes inefficient and expensive.

There is a need for an intelligent system that can automate repetitive sales tasks while maintaining personalization and customer context.

3. Target Audience

Primary Users

Digital Marketing Agencies

Need:

Manage and convert large numbers of leads efficiently.

Web Development Agencies

Need:

Identify businesses that require websites, redesigns, and digital services.

SEO Agencies

Need:

Find and prioritize businesses with poor online visibility.

Consultants & Freelancers

Need:

Automate lead management without hiring dedicated sales teams.

4. Product Goals

Business Goals

- Increase lead conversion rates
- Reduce manual sales effort
- Improve follow-up consistency
- Improve sales team productivity

User Goals

- Identify high-quality leads quickly
 - Send personalized outreach faster
 - Understand customer requirements instantly
 - Never miss a follow-up opportunity
-

5. Core Product Features

Feature 1: Agency Onboarding

Purpose:

Capture business information required for AI personalization.

User Inputs:

- Agency Name
- Services Offered
- Target Industry
- Pricing Range
- Communication Tone
- FAQs

Output:

Agency profile used throughout the system.

Feature 2: Lead Import

Purpose:

Allow users to add leads into the platform.

Supported Methods:

- CSV Upload
- Manual Lead Entry

Lead Fields:

- Name
- Company
- Email
- Website
- Industry
- Location

Output:

Lead records stored in database.

Feature 3: AI Lead Qualification

Purpose:

Determine lead quality and relevance.

AI Analysis:

- Industry Match
- Service Fit
- Business Potential
- Location Relevance

Output:

- Lead Score (0–100)
 - Hot/Warm/Cold Category
 - Qualification Reasoning
 - Recommended Service Angle
-

Feature 4: Pain Point Detection

Purpose:

Identify opportunities within each lead.

Examples:

- Outdated Website
- Missing Online Ordering
- Weak SEO
- Poor Mobile Experience

Output:

List of identified opportunities and suggested solutions.

Feature 5: Personalized Outreach Generator

Purpose:

Create customized sales messages.

Input:

- Agency Context
- Lead Information
- Pain Points
- Services Offered

Output:

Personalized outreach email draft.

Users can edit drafts before sending.

Feature 6: Email Delivery

Purpose:

Send outreach emails.

Functions:

- Draft Email
- Review Email
- Send Email
- Track Status

Statuses:

- Draft
- Sent
- Delivered
- Replied

Feature 7: Reply Intelligence

Purpose:

Analyze customer responses.

AI Extracts:

- Requirements
- Budget
- Timeline
- Objections
- Questions
- Recommended Next Action

Output:

Structured customer summary.

Feature 8: AI Lead Memory

Purpose:

Maintain context throughout the customer journey.

Stores:

- Pain Points
- Requirements
- Budget
- Timeline
- Previous Conversations
- Objections

Benefit:

Future communications become more personalized and relevant.

Feature 9: Follow-Up Automation

Purpose:

Prevent lead drop-off.

Default Sequence:

- Follow-Up #1 – Day 2
- Follow-Up #2 – Day 5
- Follow-Up #3 – Day 10

Rules:

- Stop follow-ups after reply
 - Generate contextual messages
-

Feature 10: Pipeline Dashboard

Purpose:

Visualize sales progress.

Stages:

- New Leads
- Qualified
- Pitched
- Replied
- Meeting Needed
- Won
- Lost

Dashboard Metrics:

- Total Leads
 - Hot Leads
 - Emails Sent
 - Replies Received
 - Conversion Rate
-

7. Non-Functional Requirements

Performance:

- Qualification response < 5 seconds
- Email generation < 10 seconds

Scalability:

- Support thousands of leads
- Multi-user architecture

Security:

- Secure authentication
- Encrypted credentials
- Protected lead data

Usability:

- Beginner-friendly dashboard
 - Minimal onboarding time
-

8. Technology Stack

Frontend:

- Next.js 15
- TypeScript

- Tailwind CSS
- ShadCN UI

Backend:

- Next.js API Routes

Database:

- MongoDB Atlas

Authentication:

- Clerk

AI:

- Gemini 2.5 Flash

Email Service:

- Resend

Deployment:

- Vercel
-

9. Success Metrics

Product success will be measured through:

- Number of leads processed
 - Qualification accuracy
 - Outreach response rate
 - Meeting conversion rate
 - User retention
 - Follow-up completion rate
-

10. Future Roadmap

Phase 2

- WhatsApp Integration
- Google Sheets Integration
- LinkedIn Outreach

Phase 3

- AI Voice Calling Agent
- Meeting Scheduling Agent
- Revenue Forecasting

Phase 4

- Autonomous Multi-Agent Sales Team
 - Enterprise CRM Integrations
 - Predictive Conversion Analytics
-

Conclusion

LeadFlow AI is designed to become an intelligent sales operations platform that helps agencies automate lead qualification, outreach, reply analysis, and follow-up management. By combining AI-driven decision-making with workflow automation, the platform enables businesses to convert more opportunities into customers while reducing manual effort and operational complexity.
